Portugal Porto coal-to-electricity energy storage products

Overview

Why is Portugal pushing for better electricity interconnections?

Portugal is pushing for better electricity interconnections with the rest of Europe. Portugal's National Energy and Climate Plan sets 2030 targets for emissions reductions, energy efficiency and renewable energy that aim to put the country a path to achieving cost effective carbon neutrality by 2050.

How much money will Portugal spend on energy storage projects?

This included six projects from Spain's Iberdrola, which secured nearly EUR 20 million in public funding. Portugal's Ministry of Energy has announced that it has allocated EUR 100 million (\$104.2 million) to 43 energy storage projects which should be installed by the end of 2025.

What is Portugal's Energy Plan?

Portugal's updated energy plan targets 80% renewable electricity by 2026 and 85% by 2030. Marija has years of experience in a news agency environment and writing for print and online publications. She took over as the editor of pv magazine Australia in 2018 and helped establish its online presence over a two-year period.

What is Portugal's Energy Strategy?

Develop a dedicated strategy for energy research, development and demonstration that aligns policy design, implementation and funding with the achievement of Portugal's 2030 energy sector targets and 2050 decarbonisation goals, including support for commercial deployment of new energy technologies, products and services.

Generation Opportunities
Resources
Portugal ranks as the 11th EU member state most dependent on imported energy sources, with a decreasing dependence since 2000, when 85% of its energy was imported. This is mainly due to the lack of fossil energy sources, which continues to impact the total consumption of primary energy significantly. The main fossil fuels that account for the prima See more on trade.govensun
