

# Prague solar cell modules

## Overview

---

What are the diagnostics of photovoltaic modules?

Diagnostics means: measurement of VA curves under illumination, electroluminescence and IR thermogram. If necessary, it also includes a test of the immediate insulation condition of the PV module. We focus on the production of custom photovoltaic modules. We can divide our products according to the purpose of their use:.

Where can I buy solar panels?

SOLSOL has been your reliable partner in solar energy since 2012. All orders are subject to the General Terms and Conditions. Copyright © 1996-2023, SOLSOL s.r.o. Buy photovoltaic panels, inverters, batteries, BESS and PV structures directly from SOLSOL. Professional B2B e-shop for partners with quick and easy ordering.

What are special PV modules?

Modules that are used not only to generate electricity, but are used, for example, as facades or as part of a roof (BIPV). We solve projects from project documentation through the production of special PV modules to our own installation. In general, these are modules designed for a specific purpose.

What are PV modules used for?

In general, these are modules designed for a specific purpose. The most common uses are in urban furniture: benches, street lamps, public transport stops. In the case of PV modules of smaller outputs (up to 10Wp), it is used in the independent power supply of any electronics.
