

Preliminary plan for energy storage power station project

Overview

What is the energy storage plan?

The plan outlined 21 key measures, including scaling up energy storage applications in power generation and grid infrastructure, accelerating technological innovation, and improving standardization. It also emphasized talent development and enhancing international cooperation in the sector.

What is the scope of energy storage in the PRC?

“ 国家能源局发布《抽水蓄能中长期发展规划（2021—2035年）》,” People’s Government of the PRC, 3 Jan 2023, at https://www.gov.cn/xinhua/2023-01-03/content_6848112.htm. The scope includes two categories: dispatch-controlled new type energy storage and self-used new type energy storage by power stations.

Will China develop new energy storage systems between 2025 and 2027?

BEIJING, Sept. 12 -- China on Friday unveiled an action plan to promote the development of new forms of energy storage between 2025 and 2027, amid efforts to support green energy transition and ensure the stability of new-type power systems.

What is the 14th five-year plan for energy storage?

The “14th Five-Year Plan” has specified development goals for energy storage also on the provincial level. During the “14th FYP” period, 25 provinces and cities plan to complete 77.65 GW new type storage installation. That scale is more than twice the “14th FYP” target (30 GW) set by the NEA.
