

Price of 30 kW solar panels in Japan

Overview

How much do solar panels cost in Japan?

The government encourages new detached houses to install solar panels, and subsidies greatly help reduce the costs of installing solar panels. Currently, the average price for a solar panel in Japan ranges from 200,000 to 400,000 yen per kilowatt (kW). Are there subsidies for installing solar panels in Japan?

.

How much does a photovoltaic system cost in Japan?

In 2021, the price for a residential photovoltaic system in Japan amounted to 220 Japanese yen per watt. Prices for PV systems decreased steadily throughout the past decade due to the standardization of grid-connected PV systems as well as the growth of the PV market. Get notified via email when this statistic is updated.

Why are solar PV system prices expensive in Japan?

To find out the reasons why solar PV system prices are expensive in Japan, this report examined two types of costs, PV module costs and construction costs, which are major factors of the price disparity. However, there remain issues that have not been thoroughly examined. These issues are indicated in the following.
