

Riyadh solar container battery

Overview

What is BYD energy storage & Saudi Electricity Company (SEC)?

These systems help smooth energy delivery, keep costs manageable and cut dependency on fossil fuels. Now, BYD Energy Storage and Saudi Electricity Company (SEC) push this technology into new territory. Their partnership is set to deliver a world-first: 15.1GWh of energy storage across Saudi Arabia.

How will Saudi Arabia's new energy grid work?

The new systems will be installed across five different sites in the Kingdom and linked directly to the national transmission grid. The approach reflects Saudi Arabia's strategy for an optimal energy mix, balancing conventional power with solar, wind and storage to create a more flexible and resilient grid.

What does BYD & Saudi Electricity have in common?

BYD and Saudi Electricity Company agree to deliver 15.1GWh of battery storage, strengthening Saudi's clean energy ambitions under Vision 2030. Battery storage plays a growing role in energy systems, acting as a stabiliser for grids under pressure from rising renewable inputs.

What is a battery energy storage system?

These battery energy storage systems (BESS) are designed to handle peak demand periods, ensure power continuity and support the smooth integration of intermittent renewable energy into the grid. As energy storage captures and releases electricity when needed, it creates a more predictable and reliable power supply.
