

Singapore low carbon solar container energy storage system

Overview

Does Singapore have a reliable electricity grid?

Although Singapore has one of the most reliable electricity grids in the world, However, as Singapore looks to renewable energy and power imports to transition to a low-carbon energy system, and moves towards the electrification of its transport system, it is increasingly vital to ensure that its grid infrastructure remains stable and resilient.

Does Singapore have a resilient energy grid?

The Singapore government has implemented a good number of initiatives to ensure the resilience of the energy grid, including the use of energy storage systems (“ESS”).

What is Singapore's first utility-scale energy storage system?

Singapore’s First Utility-scale Energy Storage System Through a partnership between EMA and SP Group, Singapore deployed its first utility-scale ESS at a substation in Oct 2020. It has a capacity of 2.4 megawatts (MW)/2.4 megawatt-hour (MWh), which is equivalent to powering more than 200 four-room HDB households a day.

Will Sembcorp ESS support Singapore's transition to cleaner energy sources?

Mr Ngiam Shih Chun, Chief Executive of the Energy Market Authority, said: “Energy Storage Systems (ESS) such as the Sembcorp ESS will play a significant part in supporting Singapore’s transition towards cleaner energy sources. This large-scale ESS marks the achievement of Singapore’s 200MWh energy storage target ahead of time.
