

Slovakia solar energy storage configuration requirements

Overview

How many residential PV systems were installed in Slovakia in 2024?

This means that over 1,000 residential PV systems put into operation in Slovakia in 2024 could have been equipped with a BESS, resulting in a total additional storage capacity of nearly 7,200 kWh for this category of sources.

What is the capacity of a stand-alone battery in Slovakia?

In late 2023, the Slovak Battery Alliance (SBaA) estimated the total capacity of stand-alone BESS in Slovakia to be 27.5 MWh. This section aims to provide the most accurate estimate of battery storage market developments across all sectors in 2024.

How much solar power does Slovakia have in 2024?

At the end of 2024, solar PV market in Slovakia peaked at a cumulative installed power of 1,114 MW. This total is a combination of DC and AC power owing to the fact that until 2022 all data were reported only at DC side and from 2023 onwards new installations are defined at AC nominal inverter output.

How many solar PV plants are there in Slovakia?

There are currently 479 utility-scale ground-mounted solar PV plants with almost 586 MW of installed capacity and 528 MW of rooftop PV systems in Slovakia. The largest solar PV plant to-date was commissioned in 2024 in the municipality of Iliašovce (Košice Region) with installed power at 6.3 MW.
