

Solar Water Pump 2 in 1

Overview

What is a solar powered water pump?

A solar powered water pump is an eco-friendly, off-grid solution that uses solar energy to move water from wells, rivers, ponds, or tanks—without needing electricity or fuel. Perfect for farms, homes, and remote areas, these pumps are powered by photovoltaic panels and come in both surface and submersible options.

How much water does a solar water pump use?

This solar pump kit is suitable for pumping from 0 to 120 feet head (TDH), with daily water usage of 720 to 2520 gallon. Package includes: 2THS05S36V370 Solar Water Pump Specifications: 5GPM rated, 8GPM Max. Auto control box specifications: This is a great setup that works even when there is no sun shining on the panel!.

What is a solar well pump used for?

Beyond the listed uses, solar well pumps find application in a multitude of areas, including: Residential water supply: Ensure a steady flow of clean water for your home. Community water projects: Provide sustainable water access to remote communities. Environmental restoration: Support ecosystem revitalization efforts.

What size solar pump for a 3 inch well?

This 2 inch small diameter pump is ideal for replacing an old windmill pump in a 3 inch well. 370 Watts 2" Solar Pump and Control Box (2THS05S36V370)
This solar pump kit is suitable for pumping from 0 to 120 feet head (TDH), with daily water usage of 720 to 2520 gallon. Package includes:

Solar Water Pump 2 in 1

2 inch Surface Solar Water pump

High-performance water pump delivering 25,000L/hr with 750W power. Operates at 40-90V, 13m head, 8m suction. Ideal for irrigation. Compatible with 2×300W+ solar panels.
