

# Solar lighting system hs

## Overview

---

Why is accurate HS Code classification for solar street lights important?

Before we delve into why accurate HS code classification for solar street lights is important, let's clarify what HS codes are and how they function in international trade. HS codes, or Harmonized System codes, are a standardized numerical classification system used worldwide for identifying and categorizing traded goods.

Where can I find solar lights HS code?

solar lights hs code HS-codes.com is specialize in providing harmonized tariff numbers and commodity codes. Visit us online to get the various hs codes and commodity description.

What is the HS code for solar street lights?

For solar street lights, the relevant HS code falls under 9405.40, which refers to "Electrical lighting or signaling equipment." Here's a breakdown of the classification: 9405- Represents "Lamps and lighting fittings, including searchlights and spotlights and parts thereof."

Should solar street lights be subsidized by HS code 9405?

For example, if a country has a free trade agreement (FTA) with provisions for renewable energy products, solar street lights classified under HS code 9405.40 could benefit from reduced tariffs, making them more affordable and attractive to buyers in those regions.
