

# Solar panels installed in Morocco

## Overview

---

Is Morocco ready for solar energy?

Morocco's outlook for solar energy is as bright as its desert sun. The government's latest roadmap, unveiled in March 2025, targets an installed solar capacity of 10 GW by 2030—an ambitious leap from the current 3.5 GW. New projects are underway in regions like Tata and Zagora, where high solar irradiance promises optimal yields.

Which are the largest solar PV power plants in Morocco?

Listed below are the five largest active solar PV power plants by capacity in Morocco, according to GlobalData's power plants database. GlobalData uses proprietary data and analytics to provide a complete picture of the global solar PV power segment. Buy the latest solar PV plant profiles here. 1. Noor Laayoune Solar PV Park.

What percentage of solar PV installations are in Morocco?

Solar PV capacity accounted for 16.4% of total power plant installations globally in 2023, according to GlobalData, with total recorded solar PV capacity of 1,496GW. This is expected to contribute 33.7% by the end of 2030 with capacity of installations aggregating up to 4,822GW. Of the total global solar PV capacity, 0.04% is in Morocco.

Is Morocco leading the way in solar power?

Morocco is leading the way in solar power with new technologies. It's using advanced solutions like Concentrated Solar Power (CSP) and Photovoltaic (PV) systems. This is changing the face of renewable energy in the country. The Noor Ouarzazate complex is a key example of Morocco's tech push.

## Solar panels installed in Morocco

---

### Morocco Solar Home Systems

Each of the installed systems consists of two solar panels with a total capacity of 290 watts and two batteries with sufficient storage capacity for up to three days, thus ensuring uninterrupted power supply. In addition, the ...
