# **Solar panels produced in Finland**

## Overview

---

Is solar power a real thing in Finland?

Many Finns are already familiar with solar power: solar panels can be found on the roofs of many homes, summer cottages and workplaces. As technology develops, industrial-scale solar power production is also becoming more common in Finland. Finland is undergoing a major energy transition.

Where is solar energy produced in Finland?

In Helsinki, Uusimaa, Finland (latitude: 60.1719, longitude: 24.9347), solar energy production varies significantly across different seasons. During the summer months, an average of 5.72 kWh per day per kW of installed solar can be generated, making it a suitable time for harnessing solar power.

Who are the best solar energy companies in Finland?

Fortum: Electricity company. Turn key solar energy systems. Full service chain from site assessment to system delivery and warranties. Green Energy Finland Oy: Turn key solution provider for renewable energy systems. Helen Oy: Electricity company. Construction and operating solar PV-plants.

Why is industrial-scale solar power production becoming more common in Finland?

As technology develops, industrial-scale solar power production is also becoming more common in Finland. Finland is undergoing a major energy transition. Moving away from imported fossil fuels and towards local, clean energy production will create the basis for new industrial investment.
