

Solomon Islands new solar panel manufacturer

Overview

What percentage of the Solomon Islands' electricity mix is renewable?

Renewable energy only makes up 2% of the Solomon Islands' electricity mix. Image: Namkoo Solar. A group of investment firms led by the Asian Development Bank (ADB) has partnered with the government of the Solomon Islands to finance new solar PV power plants, increase rooftop solar PV installations and support the islands' power sector reforms.

How many solar homes are there in the Solomon Islands?

"Solomon Islands currently has one of the lowest levels of access to electricity in the region, with over 85% of the population of Solomon Islands still without access to electricity and for this project alone, we received over 6,000 applications to obtain only 2,000 solar home systems," said Mr Aimaea.

How long do solar panels last in Solomon Islands?

The majority of solar energy systems installed in Solomon Islands last less than 2 years due to bad system design and poor user training. Superfly's systems are designed to last a minimum of 5 years (for basic systems) and 10 years for premium systems.

Can a solar PV system boost economic growth in the Solomon Islands?

A pilot business model for rooftop solar PV systems will also be trialled at two schools in the country. Shane Rosenthal, ADB's Pacific liaison and coordination office regional director, believes that upscaling renewable energy generation in the Solomon Islands could help unlock economic growth and prosperity.
