Spherical solar lights for night lighting

Overview

What are shapelights used for?

Add that wow factor to any indoor or outdoor space with these stunning colour changing mood lights. Shapelights can be used as portable USB chargeable battery powered lights, solar powered lights or mains powered lights giving you complete freedom of positioning anywhere in your home or garden.

Can a shapelight be used inside?

Shapelights can be used inside as mood lights for living spaces or night lights for landings or children's bedrooms. You can plug your Shapelight directly into a plug socket or charge it by USB and use it as a portable indoor light if there is no plug socket nearby. A full USB charge takes just a few hours and will provide 50 hours of illumination.

What colour are shapelights?

Shapelights bring atmosphere to any indoor or outdoor space. They can be set to gently cycle through red, green, blue, purple, pink and light blue or you can set them to stay on your favourite colour. Shapelights also offer a brighter white and warm white setting which are noticeably brighter than the colours.

Are shapelights chargeable?

Shapelights are also USB chargeable which is perfect if you don't have a good solar charging location, or as a backup during dull weather spells. A full USB charge takes just a few hours and will provide 7 nights of illumination without any help from the sun.
