

St Johns solar Power Station Energy Storage

Overview

Does Saint John energy have a battery system?

The battery system may also help Saint John Energy provide power to customers during power outages due to storm events. “Renewable electricity can be reliable at all times of the year, thanks to the latest battery storage technology,” said Steven Guilbeault, the federal Minister of Environment and Climate Change.

How much do solar panels cost in Saint John?

On average, solar panels in Saint John cost \$#.## per watt for an average installation cost of \$13,000 for a 5kW system. Depending on the solar installer you choose, the total solar panel installation cost can range plus or minus \$5,000 but the above is an average cost of a solar panel system.

What is the largest battery project in New Brunswick?

The battery project is the largest battery in New Brunswick. It consists of a 5.8 megawatt / 11.6 megawatt-hour lithium-ion battery that can deliver 5.8 megawatts of energy to the Saint John Energy grid for a two-hour period on a full charge.

Is energy storage a viable alternative to conventional power generation?

The trend to renewables and energy storage becoming an increasingly affordable and viable alternative to conventional sources of power generation is expected to continue to grow in coming years. The state of solar and the impacts of energy storage
