

Sun-chasing solar power generation system in Krakow Poland

Overview

How many solar projects are there in Poland?

The country has ambitious plans to significantly expand its renewable energy, with a particular focus on photovoltaics (PV). According to the Institute for Renewable Energy (IEO), there are more than 19 gigawatts (GW) of solar projects in planning or development in Poland.

Will solar power be a good investment in Poland in 2025?

Thanks to additional government subsidies for small private PV systems and high electricity prices of over 30 eurocents per kilowatt hour for companies, investments in own electricity generation in both areas will become attractive in 2025. In September 2024 alone, PV systems with a total power of 363.53 megawatts were installed in Poland.

What are the conditions for solar energy generation in Poland?

Poland has favorable conditions for solar energy generation, with a good amount of sunlight throughout the year. The government has introduced several measures to promote the development of the solar industry, including feed-in tariffs, net metering, and renewable energy auctions.

How has the solar sector changed in Poland?

Developments in the solar sector represent a profound structural change in the Polish energy mix. In 2023 alone, around 4.6 GW of new solar capacity was installed, increasing cumulative solar output to over 17 GW. Solar energy has already temporarily surpassed coal as the leading source of electricity.
