

The latest news on energy storage power generation companies

Overview

Which companies have energy storage projects?

Quidnet Energy, ENBW, and Peak Energy have energy storage projects in the works in the U.S. and Europe. Google has partnered with Energy Dome to scale long-duration carbon dioxide battery storage to advance its carbon-free goals. Tesla's \$3.4 billion battery project with LG Energy leads tech business news this week, along with moves by Toshiba.

Is China entering a new era of energy storage demand?

Mainland China accounts for most of the global energy storage demand, driven in the near term by regional requirements for new utility-scale wind and solar projects to include energy storage capacity. However, the Chinese market is entering an era of change.

What are China's new energy storage projects?

Recently, multiple new energy storage projects across China have reached important milestones. In Shandong, Xinjiang, Hebei, Qinghai, and Inner Mongolia, several 100-MW-level projects have either started construction or successfully connected to the grid.

What drives energy storage project development?

Globally, energy storage project development is increasingly driven by the utility-scale segment, with mandates and targeted auctions driving gigawatt-hour projects in markets like China, Saudi Arabia, South Africa, Australia and Chile.
