

# The solar inverter needs to be reconnected

## Overview

---

There are many reasons why your inverter is on but not working. Find out the causes and the solutions to this problem.

What if my solar inverter is not working?

If your solar inverter is still experiencing issues, professional support can help restore your system's performance. Solar Water Wind specialises in inverter troubleshooting, repairs, and maintenance, ensuring your solar energy system operates efficiently. Learn how to safely reset your solar inverter with this step-by-step troubleshooting guide.

Does a solar inverter need repair?

A solar inverter is not something that regularly needs repair, but it can have problems if there is a defect or it is exposed to certain conditions. Using the right solar inverter with your solar panel is an important step for ensuring your solar energy system performs optimally.

Do solar inverters have to be electrically isolated?

Yes, solar inverters must be electrically isolated at all times. If they sense voltage from a generator, they will try to sync with it and backfeed power. Whenever solar production exceeds building loads, solar inverters attempt to send excess power to the utility grid.

How to maintain a solar panel inverter?

Here are the main tips for maintaining your solar panel inverter: Every once in a while, you should wipe the inverter clean to remove dust and prevent heat buildup. This should be done at least once a year, but more frequently in dusty areas.
