

UK solar container lithium battery energy storage project

Overview

Who owns the UK's largest co-located solar & battery storage project?

German energy group RWE AG (ETR:RWE) has secured planning permission for its Byers Gill solar plus storage project in the UK, marking the company's largest consented co-located solar and battery storage project in the country. Langford Solar Farm in Devon. (credit: RWE).

How many MW of solar & battery storage are there in the UK?

Combined, these projects represent 577 MW of solar capacity along with 105 MW of co-located battery storage. German energy group RWE AG (ETR:RWE) has secured planning permission for its Byers Gill solar plus storage project in the UK, marking the company's largest consented co-located solar and battery storage project in the country.

How many battery storage projects are there?

The pipeline of battery storage projects has continued to grow steadily again, from 84.4GW in December 2023 to 95.5GW in May 2024. This edition of the EnergyPulse report on Energy Storage shows there is 8.7GW of batteries in operation and under construction and more than 30GW projects have now been consented.

How many solar projects are there in the UK?

In the UK, RWE has 11 solar projects under construction and recently brought online its first UK solar site, Langford. Combined, these projects represent 577 MW of solar capacity along with 105 MW of co-located battery storage.
