# United Arab Emirates 10 kWh of energy storage

## Overview

---

How much energy does the United Arab Emirates use?

the U.A.E. consumed 4,667,004,234,000 BTU (4.67 quadrillion BTU) of energy in 2017. This represents 0.80% of global energy consumption. The United Arab Emirates produced 9,889,545,878,000 BTU (9.89 quadrillion BTU) of energy, covering 212% of its annual energy consumption needs.

How much solar energy does Mohammed bin Rashid Al Maktoum have?

The entire solar complex at the fourth phase of the Mohammed Bin Rashid Al Maktoum Solar Park includes 150 MW of PV with the 700 MW of CSP for 950 MW of solar energy. The goal by 2030 is for the site to host 5 GW of solar energy, with the first 1 GW (950 MW) online in 2024.

What is a 700 MW solar trough?

The 700 MW combines both central tower and parabolic trough concentrated solar power (CSP) technologies, like the 550 MW NOOR I, II, and III in Morocco (Noor means “light” in Arabic). The NOOR I tower segment that came online in 2023 is 100 MW. The three trough segments are 200 MW each. The thermal energy storage totals 15 hours daily.

## United Arab Emirates 10 kWh of energy storage

### [UAE Launches World's Largest Integrated ...](#)

In a remarkable advancement for renewable energy, the United Arab Emirates, under the auspices of His Highness Sheikh Mohamed bin Zayed Al Nahyan, President of the UAE, has inaugurated the world's ...
