

# Vanadium battery station cabinet container base station

## Overview

---

What is the capacity of the world's largest vanadium flow battery?

It has a capacity of 175 MW/700 MWh. On December 5, 2024, Rongke Power (RKP) completed the installation of the world's largest vanadium flow battery. With a capacity of 175 MW and 700 MWh, this innovative energy storage system, located in Ushi, China, sets a new standard in long-duration energy storage solutions.

Why is Rongke Power a global leader in vanadium flow batteries?

With this achievement, Rongke Power reaffirms its position as a global leader in vanadium flow battery technology. The project also serves as a model for future installations worldwide, proving that vanadium flow batteries are a viable option for large-scale energy management. Follow us on social networks and don't miss any of our publications!.

Is Rongke Power completing a 175mw/700mwh vanadium redox flow battery project?

Technology provider Rongke Power has completed a 175MW/700MWh vanadium redox flow battery project in China, the largest of its type in the world. The Dalian and Hong Kong-headquartered company announced the completion of the project on business networking site LinkedIn yesterday (6 December), providing a video of the finished project.

How many substations are in the Advanced Energy station?

The advanced energy station includes two major subsystems: Station 1: 150MW/750MWh system connected via six 35kV lines to the planned 220kV substation. Station 2: 50MW/250MWh system connected via two 35kV lines to a separate 220kV substation.
