

Victoria Home Storage Battery Sales

Overview

Does Victoria have a state incentive for home batteries?

Victoria's state incentive is just one part of the picture. Starting in 2025, the Australian federal government has introduced the Cheaper Home Batteries Program, which offers a substantial rebate for home battery systems nationwide.

Can a Victorian home battery system be financed?

Eligible Victorian homeowners can access interest-free loans of up to \$8,800 for installing a home battery system, with the loan repaid over four years. This zero-interest financing effectively acts as a Victorian solar battery subsidy, making battery storage more accessible than ever.

What is the cheaper home batteries program?

The Cheaper Home Batteries Program is a Victorian Government battery rebate scheme that helps more households install battery storage and get the most out of their solar power. Whether you're adding a battery to an existing solar system or installing a new solar and battery combo, this program makes energy independence more affordable than ever.

Does Victorian have a solar battery rebate?

While the state's solar battery rebate (a direct cash rebate) has ended, it has been replaced with a generous interest-free loan to reduce your upfront costs. Eligible Victorian homeowners can access interest-free loans of up to \$8,800 for installing a home battery system, with the loan repaid over four years.
