Vietnam Pack Battery Factory

Overview

What is the current state of battery manufacturing in Vietnam?

Current State of Battery Manufacturing in Vietnam Vietnam's battery market is currently dominated by lead-acid batteries, which account for more than 60% of the market share in automotive applications.

When will LFP battery cells be made in Vietnam?

The factory in the Vietnamese province of Ha Tinh will be designed for a capacity of five GWh per year and is scheduled to start production in the third quarter of 2024. The LFP battery cells produced there will be used in VinFast e-vehicles and VinES stationary energy storage systems.

Where can I get a battery pack from VinFast?

The battery cells for VinFast's vehicles can be processed directly on site: In December 2021, VinES had also started building a factory in Ha Tinh for battery packs to be used in VinFast's electric cars and buses, which is now nearing completion and is expected to start operations in December, according to the latest announcement.

Why is VinFast building a battery factory in Vietnam?

The VinFast battery factory is part of a larger trend of battery manufacturing moving to Vietnam. Other companies, such as LG Chem and Samsung SDI, are also building battery factories in Vietnam. This trend is being driven by the Vietnamese government's support for the EV industry and the country's low labor costs.
