Wellington PV and energy storage policy

Overview

What makes our Wellington storage facility special?

Our Wellington storage facility is extra special as it has multiple access points to the storage units and undercover loading areas to protect you from the Wellington weather.

How much does a solar system cost in New Zealand?

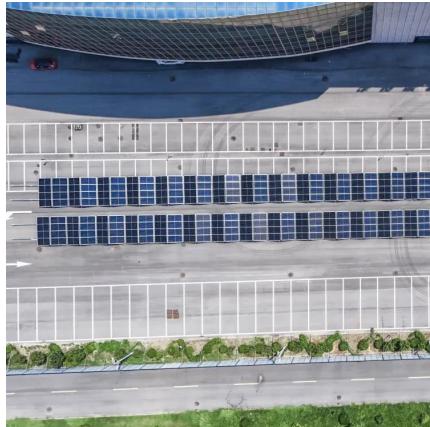

You can also start with a smaller system and scale up over time. In New Zealand: most residential homes would use a system between 1.5kW – 4kW. A panel-only no battery 4kWh system is around \$10,000. a 3kW grid-connected solar power system is popular because it helps reduce electricity costs, while remaining relatively affordable (around \$8,000).

Do solar panels need to be certified in New Zealand?

All panels and electrical work (including battery systems) need to comply with and be certified to New Zealand electrical standards. Installing solar panels can be a more cost effective and sustainable way to provide electricity for your home.
