

# What are the energy battery cabinets for New Zealand sites

## Overview

---

Is New Zealand's first large-scale grid battery storage system complete?

Construction of New Zealand's first large-scale grid battery storage system is now complete, with Meridian Energy's Ruakākā Battery Energy Storage System (BESS) being officially opened in a ceremony later today.

What is battery energy storage?

Battery energy storage - uses an electro-chemical solution that stores electrical energy and can be charged and discharged. 2.12. BESSs are widely recognised as an efficient way to store and deliver energy for finite periods of time. They are the most common new form of ESS connecting to New Zealand's power system.

What types of batteries are used in New Zealand?

The most common forms in use in New Zealand are electric vehicle batteries and stationary batteries integrated with rooftop solar installations. 2.17. Consumers with small-scale BESSs have the opportunity to be active participants in the power system.

Are Bess batteries becoming more common in New Zealand?

The cost of BESSs has fallen over the past several years, and they are now more prevalent, in the form of either electric vehicle batteries or stationary batteries. In the coming years, we are likely to see a proliferation of BESSs dispersed across New Zealand's power system.<sup>8</sup>
