

# What to do if there is condensation water in the solar container battery cabinet

## Overview

---

Condensation is caused by warm moist air coming into contact with a surface that is colder than the air's dew point. So what happens in an electrical enclosure?

In humid conditions the warmer air is.

How to prevent water condensation inside an enclosure?

An ideal way to prevent water condensation inside any enclosure is to prevent moisture getting inside the enclosure in the first place. However, in real life, this kind of protection is not always possible and we need to have other ways in which we can prevent condensation from forming.

What causes condensation in an electrical enclosure?

Condensation is caused by warm moist air coming into contact with a surface that is colder than the air's dew point. So, what happens in an electrical enclosure?

What causes condensation inside an enclosure?

In humid conditions the warmer air is the more water vapour it holds.

How do you prevent condensation in a house?

When the temperature inside drops below the dew point, condensation can form. To prevent this, install heaters, fans, or heat exchangers to keep the air inside at a stable temperature. Anti-condensation heaters paired with humidistats are especially helpful—they automatically turn on when humidity rises, keeping the inside temperature just right.

How can a non-metallic enclosure prevent condensation?

If you are not able to position an enclosure away from any temperature fluctuations and damp areas, then two of the most-often used ways to prevent condensation are ventilation and heating devices. One benefit that non-metallic enclosures have over metallic enclosures is that the insulation

properties are better and the heating capacity is lower.

## What to do if there is condensation water in the solar container bat

### [How to prevent condensation inside electrical enclosures?](#)

Condensation is formed of water droplets that gather on a cold surface when humid air is present. This is especially likely to happen outdoors when moisture and ...
