

Wind Solar and Storage Related Majors

Overview

What types of energy majors are available at the bachelor's level?

There are all kinds of energy majors available at the bachelor's level, including hard-core engineering concentrations. Use our charts to compare traditional offerings (e.g. renewable energy) with related majors (e.g. environmental science).

What can I do with a degree in Energy Systems Management?

Students at the college can begin their careers in the energy sector with an Associate's degree in Energy Production Technology and continue on to achieve a Bachelor's in Science degree in Energy Systems Management.

How can we solve the variability problem of solar and wind energy?

Solving the variability problem of solar and wind energy requires reimagining how to power our world, moving from a grid where fossil fuel plants are turned on and off in step with energy needs to one that converts fluctuating energy sources into a continuous power supply.

What can I do with a minor in Energy Science?

Lawyers, MBAs, policy analysts, and others are critical to the work being done in renewable energy. Undergraduate students from across all majors are able to secure a minor in energy science. The minor was created with support from UNL's Nebraska Center for Energy Sciences Research.
