

# Wind and solar complementary survey for solar container communication stations in Benin

## Overview

---

This review aims to identify the available methodologies, data, and techniques for mapping the potential of solar and wind energy and its complementarity and to provide significant research and patents regarding.

Does Benin have solar energy?

. Like many of the Sub-Saharan African countries, the Republic of Benin is privileged with a rich supply of solar energy resources, with annual sunshine at around 2500 h, and solar irradiation at approximately  $5.4 \text{ kWh m}^{-2} \cdot \text{day}$ .

Is there a complementarity between solar and wind energy potentials?

This paper presents a study to show the complementarity between solar and wind energy potentials in Benin Republic. Daily wind speed data in the coast of Cotonou city, precisely in Cadjehoun district, has been used to assess wind energy potential. Solar potential is evaluated using spatio temporal daily solar radiation data covering the country.

How do we evaluate the complementarity of solar and wind energy systems?

The review of the techniques that have been used to evaluate the complementarity of solar and wind energy systems shows that traditional statistical methods are mostly applied to assess complementarity of the resources, such as correlation coefficient, variance, standard deviation, percentile ranking, and mean absolute error.

Does solar and wind energy complementarity reduce energy storage requirements?

This study provided the first spatially comprehensive analysis of solar and Wind energy Complementarity on a global scale. In addition, it showed which regions of the world have a greater degree of Complementarity between Wind and solar energy to reduce energy storage requirements.

## Wind and solar complementary survey for solar container communica

### Complementarity Between Solar and Wind Energy Potentials in Benin

Complementarity between Solar and Wind Energy Potentials in Benin Republic Maurel Richy Gnanji, François Fifatin, Amédédjihundé Hounnou, Frédéric Dubas, Didier Chamagne, ...
